

Amendments to the Specification:

Please replace paragraph [0015] with amended paragraph [0015] listed below:

[0015] In the preferred embodiment, the Bluetooth specification is used for communication between electronic devices of the present invention. ~~This specification, the particulars of which can be readily obtained from the web site www.bluetooth.com, The Bluetooth~~ specification calls for the use of low power (approximately 1 milliwatt) wireless transceivers operating at 2.45 GHz. This power level provides a maximum range of approximately 10 meters. Each electronic device in the Bluetooth standard receives a unique 48-bit address in order to differentiate the devices. Data transmission is typically in the range of 500 kbps to 2 Mbps, depending on the application.
